

## Tee Cseh facilities and inventory

- SETTING:** Secluded tent sites, campfire area, covered shelter with lockable storage room. Excellent venue for Pathfinder Gold Camps.
- SLEEPING:** 20 people on main sites plus 8 on wilderness sites
- FACILITIES:** 5 patrol boxes  
Sites for 5 tents near shelter  
5 tarps for kitchen shelters with rope, poles & pegs  
3 emergency tents, ground sheets and spare poles.  
Covered shelter with woodstove, 3-burner stove, 2 picnic & 1 side table  
2 superior outdoor toilets  
Fridge on Si-Yay-Lum  
1 fire pit per tent site plus 1 large fire pit with log seats  
Water tap & liquid disposal pit (LDP)  
Also 2 wilderness campsites with water tap available a 2 minute walk from main campsite (bring own equipment)
- SITE SUPPLIES:**  
**Stored in locked shelter**
- 1 roll plastic for emergency use (*in rafters*)
  - 1 air horn and 2 fire extinguishers
  - 8 long shelter poles (*more in tool shed, bring own rope*)
  - Propane stove & tank (*bring additional stoves & fuel*)
  - Dowelling for gadgets (*bring own string*)
  - 1 plastic lat cleaning pail, “flip & drip” container & rubber gloves.
  - 1 Canadian flag (*in plastic container*)
  - 1 flag pole (*stored under eaves near woodstove*)
  - 1 large water storage pot (**DO NOT** put on open fire)
  - 2 small pots for bailers (*in water storage pot*)
  - 1 half barrel & stand with large grill (BBQ) (*outside shelter*)
  - 1 axe & hatchet – *keep in scabbards when not in use*, and wedge
  - 1 red toolbox with pliers, extra mantels, grommets, funnel, tacks, etc.
  - 1 medium kettle & 5 blackened pots for use on fires (*on counter*)
  - 2 large aluminum pots & 1 large juice jug (*on counter*)
  - 1 large coffee pot (*in leaders patrol box*)
  - 3 large blue plastic basins for dishwashing
  - 5 Coleman lanterns – *bring your own white gas*
  - 5 brooms & 2 small dustpans /brushes for tent cleaning
  - 2 old brooms (for lats only) – *these are stored on hooks in lats*
  - 2 small dustpans /brushes for tent cleaning
  - 1 inner screen for LDP & lime bin for lats
  - 4 folding chairs
  - 1 grass clippers
- SITE SUPPLIES:**  
**Stored in tool shed**
- 1 green wooden chest containing 4 small grills, 1 small pan, and assorted bowls for crafts or beach
  - 3 red handled blackened washtubs for use on fire pits
  - 4 large grills for barrel

2 buckets large tent pegs  
1 bucket small tent pegs  
1 pick axe  
2 long handled shovels & 1 trenching spade  
2 buck saws  
1 pitchfork  
about 17 shelter poles  
5 rakes  
8 fire buckets  
1 ash pot with 2 handles

- PATROL EQUIPMENT:** Each Patrol Box has 2 carry handles (poles) and a stand, (all colour coded) and contains:
- a cook set of 3 pots, 2 lids, 1 handler
  - 1 cast iron fry pan (*never wash in water – scrape out & scrub with aluminum foil & salt, and rub on a few drops of cooking oil*)
  - 1 plastic juice jug
  - 1 coffee pot
  - 3 mixing bowls
  - 1 measuring jug
  - 1 cookie sheet
  - 1 8x8 square cake pan
  - 2 plastic &/or arborite cutting boards
  - plastic colander
  - 4 each cups, glasses, plates & bowls
  - plastic wash basin for personal washing
  - 3 plastic or aluminum washbasins for dishes
  - 1 large bucket with lid for grey water
  - 2 plastic ice cream size pails with lids for clean water
  - 1 drawer with cooking utensils – 2 small & 1 large serving spoons, measuring spoons, ladle, flipper, cook fork, egg beater, potato masher, egg whisk, bread knife, paring knife, tongs, 2 mixing spoons, 2 rubber/metal spatulas, puncture can opener, can opener, 4 each knives, forks, spoons & teaspoons etc.
  - (*Note: leader's box contains extras such as bell, grater, plates, bowls, spaghetti server & pot holders*).

**PARKING:** 1 car in parking area near gate, rest in parking lot on main road near Nawilak

**NOTIFY CARETAKER AT LEAST 24 HRS IN ADVANCE OF YOUR ESTIMATED ARRIVAL TIME AT CAMP**

### **Checklist for Setting Up at Camp:**

1. Check that the fire hose is in its place (never remove it except in an emergency); also the fire extinguishers. One sits in the bracket on the shelter support; the other beside the shed door. Place the air horn on the small shelf above the door. **THESE ARE TO BE THE FIRST THINGS TAKEN OUT OF THE SHELTER AND SECURED WHEN A CAMP GOES IN.**
2. If the previous camp left the emergency tents hanging in the shelter to dry, please roll them up, place them in the stuff sacks, & return them to the top shelf corner above the green and blue patrol boxes.
3. Take out propane stove and tank and place in shelter away from the wall. Do NOT cook in the lockable storage area. If propane runs out, a small tank is available from the caretaker.
4. Patrol boxes: chipped, cracked dishes, cups, broken wooden spoons, cutlery etc. that has lost its plating or is rusted, should be disposed of and reported to the site manager (not caretaker).
5. Place filled fire buckets near each tent and fire pit, and also near the cook-shelter.
6. Find inner LDP screen – in shelter or in rafters. Cover the inner screen with a J cloth and place in LDP.
7. Fill “flip & drip” and hang on hook on outhouse. Obtain more TP from caretaker as necessary
8. Take garbage to dumpster after every meal to deter animals (there is no on-site garbage can).
9. Report any health or safety problems to caretaker. Also advise him of an empty propane tank.

### **Checklist for Striking Camp:**

1. Dismantle all gadgets, return gadget sticks to storage, remove & dispose of gadget string removed.
2. Are all areas around the campsite are clean and free of refuse?
3. Sweep shelter including the storage room.
4. Clean the propane stove and returns it and the tank are returned to locked storage and covered.
5. Fire hose is rolled neatly and in place. Return fire extinguishers & horn to storage counter.
6. Unused fire wood is returned to the woodshed to stay dry.
7. Clean brick stove out completely & place ashes in ash bucket. If ashes are cold, spread in the forest. If warm, leave in woodshed for disposal by next camp. Ditto for campfire ashes.
8. Clean the lats, remove all sani-waste & close TP lids firmly to discourage rodents & odour. Add one-half cup of lime (in plastic bin behind shed) down each lat every 2-3 days for long camps, or at end of camp for weekend camps. Fasten lime bin lid securely.
9. Leave Liquid Disposal Pit clean and closed. Remove used J cloth and rinse inner screen. If dry, screen can be stored in shelter. If wet, place in rafters in outer shelter.
10. Remove food from fridge and wipe out shelves (*its easy to forget this*).
11. All, shovels, rakes, etc. are in their proper places in the tool shed.
12. Ensure that the water tap is turned off, is not dripping & no soap is left on water tap support.
13. Patrol boxes: All cooking equipment **must** be thoroughly dry and properly stored in patrol boxes. A checklist of patrol box equipment is in each of the boxes’ drawers. **A guider needs to check and initial the sheets for each patrol box used.**
14. **Close and lock shutters**
15. Return any equipment borrowed from the Camp Olave caretaker.
16. Complete yellow comments sheet noting any problems and return it and the keys to the caretaker.

### **Repacking the storage shed:**

Space is at a premium so put things back where you found them. When packing the shed, the patrol box stands are on the top shelf with the tarps. The boxes are on the bottom shelf. Miscellaneous items are on the middle counter. Put the patrol boxes back into the shelter in the correct colour order so that they will fit! Put the blue one in first. The carrying handles for the patrol boxes are neat the yellow box. Many items in the box are colour coded to help you in identifying each piece as patrol equipment.

**Please make sure the shutters are closed and locked before you leave.**

### **Shelter Tarps:**

Each of the five sites has a kitchen shelter tarp with ropes attached to each corner. These tarps are NOT to be put on the ground. Any additional ropes added to the tarps should be removed at the end of the camp. The blue and white corner ropes are to remain on the tarps.

If the shelter tarps are wet when you are striking camp, they may be left hanging from ropes in the outside shelter to dry. If dry, they are folded and stored on the upper shelf in the shed.

### **Additional information if using the emergency tents:**

There are three “8-man” nylon dome tents for emergency use only as they have some non-functioning zippers. There is sufficient space in each of the tents for 4-5 girls and their gear. Shoes/boots are **NOT** to be worn in the tents, but for overnight may be placed inside the door. When girls are entering/exiting the tents they must **fully** unzip the top and bottom zippers of the door. This will reduce the strain on zippers. Pegs are in the tool shed. When striking camp, Guiders-in-Charge should check tents for inside cleanliness and ask each patrol for reports of any damage that they have observed. The GIC should note the tent number, complaint, and notify the site manager (NOT the caretaker) on returning home.

### **Storage of Wet Tents:**

The nylon dome tents **MUST NOT** be rolled wet. Hooks have been placed inside the shed and permanently installed ropes for drying wet tents/flies are to be used. Tents and flies **MUST** be hung **after** the patrol boxes and **all** other items that need to be returned to the shed have been put in their correct place; i.e. **the tents are the last items to go in the shed**. For security reasons, we cannot hang the tents outside in the covered shelter area.

**Hang the flies first.** Wet flies should be hung from their center tie (top middle) on the ropes to the right of the door (near the blue & green patrol boxes. These ropes are permanently installed and must not be removed.

Tents that need drying should be hung at the left-hand end of the shed on the long “clothes lines” which are provided. There are hooks on the end wall to release the clothesline so that tents can be draped over them. The clotheslines are then re-hooked so that the tents are suspended above the ground. Note: please be sure that the mesh side of the tent faces up so that the moisture can evaporate through the mesh. Also, outer doors need to be left unzipped to expose the mesh screen. Screen doors should be zipped shut.

### **Dry Tents:**

If tents are completely dry when you strike camp, they should be turned inside out so that all sand, dirt, etc. can be shaken out. They should be rolled with the fly and placed in the stuff sack (tent, fly and stuff sack of corresponding numbers together). NOTE: Poles will not fit in the tent bags. They should be put into their own stuff sacks and be placed on the shelf in the shed beside the tent stuff sack. Wipe dirt off tent pegs and place them in the peg bucket and return to the tool shed.

### **Ground sheets:**

Ground sheets have been cut to size for the tents. They are to be placed on the ground **outside** the tents. Remember: any plastic extending beyond the tents should be tucked under – there should be NO plastic showing when your tents are properly put up.

When striking camp, ground sheets need to be swept and folded. They are to be placed on the upper shelf under the tent stuff sacks. If ground sheets are wet, they may be left hanging from the ropes in the **outside shelter** to dry.
